

## References (in citation order)

If original reference is written by Cyrillic alphabet then it should be duplicated by Roman alphabet in such manner:

- authors' names should be transliterated;
- papers' or books' titles should be translated into English;
- journals' or publishers' names should be transliterated;
- for other output data only numbers should be used.

Original language should be specified (in brackets) if it is not English.

Hyperlink should be specified too (if any). And first of all the DOI.

CrossRef service <https://apps.crossref.org/SimpleTextQuery> can be used to find DOIs.

Searching results can depend on style of citation. So, results should be verified.

More often used styles are here <https://libguides.williams.edu/citing/acs>

Citation in References more closely to [ACS-style](#)

## References

If list of references contains items translated from Russian, Ukrainian or other languages then these items must be written in original language in a copy of References (at the end the file). Such list will be used on Ukrainian and Russian pages of website.
